

16 million  
shades  
to colour your world

# Wake up to iLight and enhance your world

A new generation of ultra-efficient, programmable wireless home lighting that you can control from anywhere with your smartphone or tablet.

**Turning on iLight enhances your everyday experience because it is:**

**Inexpensive.** No costly automation system to purchase, just an iLight bulb and Wifi Bridge.

**Efficient.** Long-lasting LED iLight bulbs are the most efficient bulbs available.

**Easy to install.** No wiring or electrician. Just download the app and install your iLights.

**Intuitive.** Control all your iLights with the tap of a finger, from anywhere anytime.

**Scalable.** Install one iLight, an entire constellation, or fit out your whole home. It's easy.

**Flexible.** iLights work in any standard light fitting – ceiling lights, wall lights or lamps.

**Fun.** iLights enhance your lifestyle – any colour, anytime, anywhere you like.

You can control and program your iLights by using the app, switching them on or off at the wall using existing switches or with an iLight wireless switch that you can install yourself.

# Whatever your mood or occasion, colour it with iLight

Whether you're dancing to Purple Rain or cooking Chicken Verde, you can set the perfect mood with iLight.

iLight wirelessly controls your lights from anywhere anytime, turning your everyday lighting into memorable moments of colour.

-  Wake up to a fresh, natural start each day by using iLight to gradually increase the light intensity like sunlight.
-  Be welcomed home or set your iLights to come on at a pre-set time while controlling them from anywhere.
-  Switch off your iLights automatically when you leave a room or use schedules for every day use.
-  Turns your living room into a dancefloor by syncing iLight to your favourite music.
-  Paint your walls the colours of your favourite team to enhance your game day experience.

# More than just a light bulb, iLight is living technology

iLight will fill your house with more than colour. It can sync with your music, link to your alarms, timers and alerts and even help regulate your body clock.

#### **BIOLOGICAL**

iLight creates the perfect environment for your needs, so you can take advantage of the biological benefits of light by regulating your circadian rhythm, commonly known as your body clock.

#### **AMBIENT**

You can use iLight to set the mood, change the ambience or even transform entire spaces. With the tap of an app, you can instantly set the perfect tone to enhance any moment.

#### **SCHEDULE**

iLight can become an integral part of your day-to-day life. Alarms, timers and alerts can all be tailored to the life you lead.

#### **SECURITY**

Keeping your home more secure is easy with iLight, you can turn your lights on even when you're not home making it seem like you're still there.

#### **MUSICSYNC**

iLight lets you control the show, all within a few easy clicks. By making the lights dance in sync with the music, you can get that party started!

#### **INTEGRATE**

Integrate iLight with iZone and complete your living technology solution. iZone's intuitive touch screen delivers complete, home-wide control and savings.

# Colour and control your lifestyle

iLight will add a lively splash of colour to your house while being kind to the environment - they are 80% more energy efficient than standard globes and last for up to 40,000 hours.

 **No installation costs.** You don't need an electrician. Simply install them yourself in any screw or bayonet light or lamp fitting.

 **Cut your energy bill.** iLights are 75-80% more efficient than standard light bulbs.

 **Save on replacements.** iLight bulbs can last up to 20 years\*.

 **Reduce energy waste.** Program iLights to turn off automatically when you leave the room.

 **Select auto adjust.** iLights can dim or brighten automatically to suit the ambient light level.

 **Install a wireless 'goodnight switch'!** Switch all your lights off or on with a single push of a button.

 **iLight is energy efficient.** iLight bulbs only use a maximum of 9 watts so they'll pay for themselves very quickly.

\*Based on an average LED lamp life of 40,000 hours.

iLights can be installed anywhere in your home.

Getting started is as easy as

- 1
- 2
- 3

- 1 - Download the app
- 2 - Install your iLights
- 3 - Pair and play

# The brighter side of innovation and technology

iLight gives you the power to instantly choose and enjoy high tech, LED lighting with 16 million colours and shades of white light.

The system is based on intelligent, radio-controlled light bulbs which you can control through an app on your iOS, Android or Windows smartphone or tablet.

- Install one iLight.
- Install an iLight constellation.
- Install iLights throughout your entire home.

# Welcome home to a smart zone of modern comfort

iLight has been developed by Airstream, the company who develops and manufactures Australia's most intelligent and efficient climate control system, iZone.

You can complete your living technology solution by integrating your iLights with iZone for complete, home-wide control and savings.

LIVING TECHNOLOGY

## iLight is designed to colour your world

It combines energy-efficient LED lighting with intelligent, radio-controlled light bulbs, which you control through an app on your smartphone or tablet. iLight is your smart choice in innovative, home lighting solutions.

Feature	Benefit
<b>Product Summary</b>	iLight is a personal wireless lighting solution for your home. You control the lights and select the perfect shade and brightness, all from your smart phone, tablet or iZone touchscreen.
<b>Power supply</b>	240 Volts / 50Hz.
<b>Screw fitting (E27)</b>	✓
<b>Bayonet fitting (B22)</b>	✓
<b>Brightness</b>	644 Lumens ≈ 60 Watt of standard incandescent bulb.
<b>Energy consumption at maximum brightness</b>	9 Watts.
<b>Energy consumption in standby mode</b>	0.22 Watts.
<b>Efficiency</b>	71 Lumens / Watt.
<b>Colours</b>	16 million colours.
<b>Colour temperature kelvin</b>	1000 K to 6300 K.
<b>Lifetime</b>	Up to 40,000 hours ≈ 20 years at 5 hours use per day.
<b>Maximum number of bulbs</b>	128 on a single network.
<b>Warranty</b>	2 years.
<b>iOS</b>	✓
<b>Android</b>	✓
<b>Windows phone</b>	✓
<b>Control from multiple devices simultaneously</b>	Unlimited number of devices can control the iLight system either through the Wi-Fi network or mobile internet.
<b>Control from wall switch</b>	Access from iLight apps is lost though to bulbs that are turned off by wall switches. When turned on, bulbs will resume their previous settings before they were turned off. 3 different options are available for this function.

Feature	Benefit
<b>Addition wall switches</b>	With iLight you can add new RF wall switches to control your iLight. No electrician required.
<b>Auto brightness control</b>	If iLight RF wall switches are used you can automatically control the brightness of the iLights in the room via a light intensity sensor installed into the iLight switch. So as the sun goes down the iLight automatically increases in brightness.
<b>Occupancy sensing</b>	Each iLight switch is fitted with an occupancy sensor that can be configured to automatically dim or switch off when the room is unoccupied.
<b>Control away from home</b>	Users can monitor and control their iLights once they have registered on the website for remote access.
<b>Control bulbs individually or in groups</b>	✓ Unlimited number of groups.
<b>Security</b>	As strong as the Wi-Fi network. Supported devices connected to the same Wi-Fi network with iLight app will have control over the bulbs.
<b>Dimming and brightness adjustment from app</b>	✓
<b>Colour adjustment from app</b>	✓
<b>Memorise up to 9 favourite settings</b>	✓
<b>Schedule any favourite to start or stop according to the time or day</b>	✓
<b>Automatically increasing light wake up alarm</b>	✓
<b>Sync music into iLight</b>	✓
<b>Holiday mode</b>	The iLights can be set to randomly turn on and off to make it look like someone is at home.
